streets, walked a poor woman, thin and small, wrapping closely about her a well-worn shawl. By her nide gambolied a little friently dog. His small tail was held resolutely in the air and he loped along in three-inch steps having the nicest time in the world. It was the richest joy to see how utterly insensible he was to the three-score miles an hour of wind which was trying to blow him the wrong way.

Suddenly the cruberant little our ran against a small child coming along with its father and an older sister. The dog was haven a good time with himself that he couldn't look out for infants. The sidewalk was slippery from the rain which had frozen on it, and down slid the joyous little dog on his side.

on it, and down slid the joyous little tog be side.

It quite upset him for a moment, not only literally, but metaphorically. He scrambled to his feet in the quickest way in the world, cocked his head and tail in the air and trotted on just as good-naturedly as if there were no children or slippery sidewalks in the uni-

verse at all.

Suddenly it seemed to occur to his small intelligence that little dogs ought not to be bowled over in that way and accept it as a matter of course, nor even regard it lightly. So he turned around to the poor old woman and began breaking in a very excited way. But his small tail wagged just as contentedly as ever. He made believe mad with his bark, but forgot to put a check on his wagging tail.

It was an odd sight, not without a certain pathos.
That poor old woman moving along, a sojourner in the valley of humility, pressing
her thin shawi around her to keep her thin
body warm, moved along with such a deprecatory air as if she was apologizing for existing at all in a world which had no use for
reverty or hungry people.

Then, the luxurious happy little dog, who was just as attentive to the poor old lady as if she were a Duchess, and nearly went out of his head with delight when she said a few words or took any notice of him.

It showed what a democratic creation the dog is when taken in a natural unsophisticated state. Had he been brought up on Fifth avenue and fed on Huyler's chocolates and taken out to be aired in an open carriage every day, he would have sniffed at the old ady and treated her with unbounded contempt. Perhaps he would even have barked it her. As it was he cared for nobody in the universe as he did for his poor mistress.

The lady is very considerate of her help, and knew the girl's beau, or at least she thought she did, by sight.

One night recently, after dinner, Sarah said to her mistress, who was going upstairs to sit at the front window for a breath of air:

Miss Lillie, if you see Jim waiting for me, tell him to come in, if you please. I won't be through for a long time yet, and it's chilly outside."

Imagine her horror when the man turned full face to her and she saw that she had addressed the wrong one.

She banged down the window and retired precipitately. She thought she had seen the last of him, but she was mistaken. Going to the window an hour later she saw the fellow on the other side of the street.

He bowed, amiled and raised his hat, evidently thinking he had made a mash, and she fied again.

The story leaked out some way and the boarders have been in a broad grin ever since. Every evening, nearly, the big black man can be seen on duty in front of the house, and it will soon be necessary to invoke police interference.

"He deserves it. He is a good one," said another.

"Will men be admitted?" asked a third.
"No. Even the attendants will be of the female sex," said Dick, and then the reporter began to understand that they were talking about a gambling room for women, and meekly saked if that was so.

"Yes," said Dick, "and it's the finest one of its kind in town. Everett runs a place himself, and he is backing this one; but his wife is the nominal proprietor, and he will never show up there. He started to work the scheme last summer. His wife came of a good family, which disowned her for marrying Jack.

The here of R. Haddon Chambers's play, "Captain Swift," which was produced at the Madison Equare Theatre last night, is an escaped oriminal. But we are told that New York audiences do not like suicides, so to their peculiarity art is sacrificed, and Capt. Swift is merely arrested leaving everybody uncomfortable, and sending the audience home dissatisfied. The last sot of "Captain Swift" is distinctly weak.

There is no comedy element in Mr. Chambers's play. The gloomy subject is treated without the least contrast. There is a great deal of mystery, but it leads to nothing at all. Mr. Chambers is anxious to swaken as week, surprising at resisting the services of the services as a services.

He is not at all successful.

The only reason I can imagine why "Captain Swift" should have made such a big success in England is that the Londoners, though they won't confess it, dearly love a spice of immorality in their plays, especially when the guilt is confessed, and can thus be condoned. merely that guilt can be successfully covered up in time, if only the guilty parties will have pa-

It was noticed by many who attended the sparring match between Tom Lees and Jack Fallon in Palace Hall. Brooklyn, Monday evening, that Lees used his right arm very little, even refusing to take advantage of several easy openings offered him. Yesterday the reason for this was explained by the postitive statemant, made by a man whose knowledge cannot be doubted, to the effect that Lees's right arm was so lame that it was of no use to him.

Walker came from London to this country and settled in Providence. James took up his trade of plastering, and his wife was successful as a dressmaker. They had an only child, Richard, then nine years old.

Things ran along smoothly until 1876, when one day James was surprised to find that his wife had left her home. There had been occasional spats between the husband and wife, but never anything serious.

In 1880 James tired of the plastering business and came to New York. He found employment as a private coachman, and dropped out of sight.

In 1882 the son, Richard, also secured work in New York, but no trace of him is now to be had. When Annie Walker deserted her husband she settled in Kansas City, where she opened a profitable dressmaking business, and almost immediately married one Ned Lawson, a well-to-do farmer, who died shortly thereafter, leaving Annie some \$12,000.

On March 16, 1886, Annis died, bequeathing her property, reduced to \$8,000, to her son Hichard. It would have amounted to \$26,000 had she not had a penchant for making expensive presents to male friends, such as \$14,000 house and lot in Kansas City, presented by her to a musician who formerly lived in New York.

At present John A. Carr, administrator of the estate, is seeking Richard, he having come to this city from Providence expressly for that purpose. He is quartered at the McPyke Hotel, 50 East Tenth street.
